

Interludio di Chimica, Musica e Poesia sull'Amore

On the occasion of Republic Day, this show tells us about Love and all its most elusive peculiarities. The matter/spirit contrast is recomposed through a double magnifying glass, one humanistic and the other scientific. While "La Materia" explains the emotional reactions on a molecular level, "The spirit" responds with Music and Poetry that evoke the nuances of this feeling; meanwhile, Chemistry represents them in a spectacular way.

"Da mihi basia mille deinde centum"

A show dedicated to the guys who have always been in love
